 Anord Jailos

- Data analyst
- Data specialist

Skills

Programming Skills

Python programming

R programming

C++ Programming

Data Analysis & Science skills

Data Visualization

Data Cleaning

Social Network data analysis

Data analysis

Machine Learning

Data manipulation

▪ Data scientist

Motivated and versatile **Data Scientist** with strong expertise in data collection, cleaning, analysis, machine learning, and visualization. Proficient in Python, R, Excel, and visualization tools. Experienced in fieldwork, tax systems, and real-world projects. Known for analytical thinking, technical skills, and commitment to using data to solve real-world challenges.

Education

Bachelor Degree in Data Science

Oct 2022 – July 2025

Eastern Africa Statistical Training Centre (EASTC), Dar es Salaam

- Proficient in Python & R for data manipulation and analysis
- Experienced with data visualization tools (Tableau, Matplotlib)
- Hands-on projects in data cleaning, collection, and preprocessing
- Applied statistical methods and ML algorithms for insight extraction

Secondary Education (Advanced level)

July 2020 - May 2022

Songa Secondary School, Tanga

- Studied key subjects including Applied Mathematics, Chemistry, Biology, Geography, and General Studies
- Developed strong analytical, scientific, and communication skills through rigorous coursework.

Secondary Education (Ordinary level)

Jan 2016 - Nov 2019

Mfundia Secondary School, Tanga

- Acquired knowledge in Social Studies covering civics, history, and geography, broadening perspective on societal structures relevant for data context interpretation.
- Developed fundamental skills in core subjects such as English, Mathematics, and Sciences.

Certificates

Career Readiness & Professional Growth

Sept - 2025

Program Certificate

Kaziconnect & U.S. Embassy

- Awarded by Kaziconnect and the U.S. Embassy for completing a five-week Career Readiness & Professional Growth Program focused on leadership, soft skills, digital tools, and workplace ethics.

Tools

Microsoft word

Microsoft Excel

Microsoft PowerPoint presentation

Techniques

Cloud computing

Data collection techniques

Web development

Languages

English

Swahili

German

Hobbies

- Music
- Movies
- Playing Video games
- Photographing
- Travelling
- Volunteering

Qualities

- Problem Solving
- Adaptability
- Effective Communication
- Team Collaboration
- Analytical Thinking
- Time Management
- Interpersonal Skills
- Self-Motivation
- Attention to detail
- Conflict Resolution

Extracurricular Activities

Field Work Training Jul 2024 - Sep 2024

Tanzania Revenue Authority (TRA), Dar es Salaam

- Extracted, filtered, and analysed taxpayer data to support revenue collection and compliance efforts
- Engaged directly with taxpayers via phone to validate and update critical business and employee information
- Prepared detailed reports and summaries using Excel and other tools to assist in decision-making and policy formulation.

Remote work Jul 2025 - Dec 2025

AI Data Specialist, Annotator (Freelance), RWS PLC

- Performed audio transcription, data annotation, validation, and review to support AI and machine learning model development
- Processed speech, text, linguistic, and social media data in accordance with detailed project guidelines
- Conducted quality checks, error detection, and data corrections to ensure high accuracy and consistency
- Maintained confidentiality, productivity, and compliance standards across multiple remote projects

Social Networks Operator Aug 2025 - Dec 2025

Tanza Fashion Trade, Dar es Salaam.

- Managed professional outreach and client communication via social networks for stock market education and investment services.

Projects

Diabetes Type 2 Prediction Using Machine Learning Model

Final Year Project – EASTC, 2025

- Developed a machine learning model to predict Type 2 Diabetes using patient health data.
- Used Python, Scikit-learn, and Pandas for model training and evaluation.
- Achieved ~87% accuracy with Random Forest after testing multiple classifiers.
- Integrated model into a secure Django-based web system with real-time prediction.
- Contributed to data preprocessing, model tuning, system testing, and documentation.

AI-Powered Customer Churn Prediction System

Personal Project – May, 2026

- Developed an end-to-end ML system for customer churn prediction using telecommunications data.
- Built and evaluated Logistic Regression, Random Forest, and XGBoost models, achieving ~80% accuracy.
- Created a Streamlit web app for real-time churn prediction and customer risk assessment.
- Designed a Power BI dashboard for churn analytics, customer segmentation, and KPI reporting.
